## Could Nanomedicine Be Worse Than Microchips? Sixbert SANGWA • September 28, 2024

As Christians living in these unprecedented last days, it is vital that we remain watchful, discerning, and

spiritually aware of the technologies and ideologies shaping our world. Nanomedicine—a cutting-edge development within the broader scope of nanotechnology—seems, on the surface, to offer hope in the realms of health and healing. However, when we peer beneath the veneer of progress, darker, more insidious forces emerge. This article seeks to expose the sinister agenda driving the development of nanomedicine and its potential use by secret societies and global elites to control, manipulate, and fundamentally alter human beings in ways that challenge our God-given identity and free will. By understanding this, we equip ourselves with the knowledge to remain steadfast in our faith, resisting any attempt to compromise our spiritual freedom.

What is Nanotechnology and Nanomedicine?

### measured in nanometers—one-billionth of a meter, so this technology operates on a scale invisible to the

human eye. Nanotechnology is already used in various industries, including electronics, food packaging, and cosmetics and healthcare, allowing scientists to manipulate matter at an incomprehensibly small scale.

In medicine, nanotechnology has given birth to nanomedicine, which involves the use of nanoscale tools, such as nanobots, to diagnose, treat, and even prevent diseases. These tiny robots can move within the human

Nanotechnology refers to the manipulation and engineering of materials at the atomic or molecular level,

revolutionize the treatment of diseases, offering hope for conditions like cancer, neurological disorders, and even infectious diseases.

Nanotechnology, however, is a double-edged sword. While it offers medical benefits, it also opens the door to potential manipulation and control, especially if misused by powerful entities with hidden agendas. In recent years, nanomedicine has gained attention in the context of COVID-19 vaccines. For example, the Pfizer-

BioNTech COVID-19 vaccine used lipid nanoparticles to deliver mRNA into the body. Indeed, **Pfizer** has been

body, target specific cells (like cancer cells), and deliver treatments with precision. This technology promises to

linked to developments in this area, collaborating with Bionaut Labs, a company specializing in DNA nanorobots. This isn't just a medical advancement—it's a potential weapon for control, capable of altering the very fabric of our humanity. Though these innovations seem beneficial, Christians should be aware of deeper concerns about the future of nanomedicine.

The Dark Agenda: Nanotechnology as a Tool for Control

Nanomedicine's potential for healing is undeniable, but this same technology could be repurposed as an instrument of control. Secret societies and global elites have long sought ways to manipulate and dominate populations, and nanotechnology offers them a frighteningly effective means to do so. As we peer into the

fundamentally changing what it means to be human. Nanorobots—microscopic machines developed to

perform medical functions inside the human body, such as cutting through tissues or repairing cells—pose a

particular threat. By introducing these nanobots into the human body through vaccines, medical treatments, or

other means, those in power could exert influence at the most fundamental biological and neurological levels.

### future, it becomes clear that this technology could be weaponized to alter human physiology and psychology,

Are the 21 Goals of Illuminati Being Implemented in the Global Context?

How Does the "Medical Death Industry" Align with the Illuminati's Agenda?

Dr. Robert Malone, a renowned virologist and immunologist, has recently warned about a potential sinister agenda behind developments in nanotechnology and medicine. In <u>an interview with The Epoch Times</u>, Dr. Malone highlighted how microscopic machines could be programmed to target specific areas of the body. He expressed particular concern about the possibility of using nanorobots to manipulate the nervous system, potentially allowing external control over an individual's bodily functions and even thought processes.

Similarly, Dr. Aseem Malhotra, a British cardiologist, has also spoken out about the potential dangers

we will witness in our lifetime." He emphasized how pharmaceutical companies and health authorities potentially misled the public about the safety and efficacy of these vaccines, which utilize nanotechnology for delivery.

Both Dr. Malone and Dr. Malhotra's revelations underscore concerns that advanced medical technologies, including nanorobots and mRNA vaccines, could be used to control our bodies from within, serving the agenda of those who desire power over the masses. While acknowledging the promising medical applications of these

technologies, they emphasize the significant risks, especially when used by the wrong hands for nefarious

associated with COVID-19 vaccines and the broader implications for public health. In a shocking revelation, Dr.

Malhotra stated that the COVID-19 mRNA vaccine rollout might be "the greatest miscarriage of medical science"

influence human behavior, thoughts, and emotions. The alarming possibility is that once these microscopic robots enter your body, they could be programmed to make you compliant, submissive, and even unable to make your own decisions. Technology has often been linked to biblical prophecy about a global system where no one can buy or sell without the mark of the beast—a tool of total control over humanity (Revelation 13:16-17). However, this goes beyond mere economic control; it's control at the most intimate and personal level—control over one's mind and will. If nanobots can indeed influence our emotions, thoughts, and free will, then our capacity to choose God, to repent, and to seek salvation could be at risk. The elites' desire for control isn't just political or economic—it's spiritual.

These nanobots, programmed to interact with the nervous system, brain, and even our DNA, could potentially

The Terrifying Loss of Free Will: A Threat to Salvation

One of the most alarming aspects of this technology is how it undermines free will, which is essential to Christian faith and salvation. God created human beings with the ability to choose between good and evil, between righteousness and sin. This capacity for choice is at the heart of the Gospel, for it is through our free will that we are able to accept or reject Jesus Christ as Lord and Savior. Romans 10:9 makes it clear: "If you confess with your mouth, 'Jesus is Lord,' and believe in your heart that God raised Him from the dead, you will be saved".

However, if nanotechnology is used to control the human mind, then the ability to make this free decision could

be stripped away. Nanobots could alter our thoughts, manipulate our feelings, and make us unable to seek

an assault on the soul, which is the real battlefield in these end times.

The Sinister Dream of Transhumanism: Merging Man with Al

You Won't Know When Nanobots Are in Your Body

God, leaving us spiritually helpless. This goes beyond the potential physical harm nanobots might cause; it is

### Transhumanists envision a future where humans are merged with artificial intelligence (AI) and augmented through technologies like nanobots. These elites dream of creating a "new humanity" where enhanced intelligence, strength, and even immortality can be achieved through technological intervention. For example, Prof. Yuval Noah Harari, a well-known historian, futurist and senior advisor of the World Economic Forum, has spoken extensively about this vision of the future. In his 2015 book "Homo Deus: A Brief History of

Instead, scientists will intentionally re-engineer human beings by rewriting genetic codes, altering brain circuits,

and even merging the human mind with Al. This is not mere speculation; companies and research institutions

Tomorrow," Harari claims that bioengineering will no longer wait for natural selection to shape humanity.

around the world are actively pursuing these technologies with the goal of "upgrading" humanity.

An even more chilling development is how nanotechnology fits into the broader agenda of transhumanism—

the belief that humans can and should transcend their biological limitations through technology.

This vision, however, is deeply blasphemous. It echoes the very temptation that led to humanity's fall in the Garden of Eden, when the serpent told Eve that she could "be like God" (Genesis 3:5). In seeking to create a superhuman race, these elites are not only trying to play God—they are attempting to replace Him. They are rejecting the inherent value and dignity of being made in the image of God (Genesis 1:27), opting instead to become their own creators.

In fact, the idea of merging humans with AI through nanotechnology is not just a scientific ambition—it is part of

a broader Luciferian agenda. By manipulating human biology and merging it with technology, these elites hope

to create a new race of beings, devoid of the image of God and subject entirely to their control. This is not

merely a scientific or philosophical movement; it is a spiritual assault on the nature of humanity as created by

One of the most terrifying aspects of this technology is its stealth. Nanobots are invisible to the naked eye, meaning that they could be injected into the human body without your knowledge or consent. Whether through vaccines, medical treatments, or even food and water supplies, these nanobots could find their way into your system. Once inside, they can remain undetected, working silently to monitor your health, alter your behavior, or carry out pre-programmed instructions from those in power.

This is not mere speculation. The recent development of COVID-19 vaccines, some of which have utilized

nanotechnology for delivering genetic instructions into the body, has already demonstrated how quickly and

quietly nanotechnology can be deployed on a global scale. While these vaccines have been publicly framed as

efforts to curb the pandemic, the speed and scale of their distribution raise concerns about what other technologies might have been included without public awareness.

Pfizer, one of the main developers of COVID-19 vaccines, has been particularly scrutinized for its involvement in nanotechnology research. Reports indicate that Pfizer has collaborated with Bionaut Labs, a company specializing in DNA nanorobots, to explore ways of using nanotechnology for both medical and non-medical purposes. Additionally, Pfizer has partnered with Acuitas Therapeutics to develop lipid nanoparticles for

various therapeutic applications. These partnerships between pharmaceutical companies and nanotechnology

labs suggest a future where nanobots could be widely distributed through medical treatments or other

ubiquitous, monitoring our health, interfacing with our brains, and even enhancing our cognitive abilities. While these claims are often framed in the context of improving human life, the underlying reality is much darker. The real end goal is not human enhancement—it is control. These nanobots will not only monitor your health; they will also have the potential to alter your thoughts, emotions, and behavior. Imagine a world where your very perception of reality could be manipulated. Nanobots could create artificial sensations, simulate augmented reality, and even induce emotional responses, making it impossible to know what is real and what is not. This kind of control goes beyond physical manipulation—it extends into the spiritual realm, where

The rise of nanomedicine and nanotechnology is not just a scientific issue—it is a spiritual crisis. As Christians,

we must be vigilant in understanding these developments, recognizing them as potential instruments of control

that could undermine God's authority over creation. While we are approaching a time of increasing spiritual

darkness, we take comfort in knowing that Christ, who is preparing to rapture His church, remains our sole

The Bible warns us in Ephesians 6:12 that our struggle is not against flesh and blood, but against the rulers,

authorities, and powers of this dark world, and against the spiritual forces of evil in the heavenly realms. As we

By 2030, some futurists and technologists predict that nearly every human being will have nanobots in their

body. Ray Kurzweil, a leading voice in transhumanism, has suggested that by the 2030s, nanobots will be

# near the last trumpet, we must equip ourselves with the full armor of God, standing firm in the truth of His Word and resisting the deception and manipulation of the world. Let us be alert, as Peter calls us to be in 1 Peter 5:8, knowing that the enemy is prowling around, seeking someone to devour. Yet we stand in the confidence of Christ, who has already overcome the world and promises to deliver His faithful. As we face the challenges of advancing technology and spiritual warfare, let us remain steadfast in our faith, placing our trust in God's sovereign plan and the imminent return of our Savior, rejecting the false promises of technological salvation and finding our security in Christ alone.
